

FEBRUARY 20

Tell government you care about *caribou and jobs*

The Alberta government is holding Public Information Sessions on caribou planning, starting in Whitecourt on February 20.

The Province's caribou range plan could hurt employment, investment and prosperity in our area. A strong community turnout will send a message to government that, while caribou are important, so are jobs, families and communities.

Before heading to the government information session, attend the Whitecourt & District Chamber of Commerce pre-event, to learn more.
